PROFESSIONAL SUMMARY

Brooklyn-based cybersecurity innovator, creative strategist, and luxury pet-care entrepreneur with expertise in cloud security, design strategy, and creative direction. Through years of working with high-touch clients and aesthetic design, I learned that security begins with trust. I bring human insight, visual intelligence, and a detail-driven mindset to cybersecurity, creating systems that feel both safe and beautiful.

TECHNICAL SKILLS

Cloud Security: AWS Security Services, SIEM Implementation, Threat Detection

Programming: Python, JavaScript, HTML/CSS, SQL, Flask & NLP

Design & Strategy: Creative Direction, Brand Strategy, User Experience Design

Tools & Platforms: GitHub, AWS Console, VirtualBox, pfSense & Kali Linux

PROFESSIONAL EXPERIENCE

Cybersecurity Innovator | Independent Consultant | 2023 - Present

??? Developed SOC-it-to-EM-SIEMlessly platform for AWS-based security analysis

??? Implemented advanced threat detection capabilities with Wazuh and OpenSearch

??? Created comprehensive security architecture solutions using Terraform

Creative Strategist | Luxury Pet Care Innovation | 2022 - Present

??? Led creative direction for luxury pet care services

??? Integrated technology solutions with premium service delivery

??? Developed brand strategy and visual storytelling initiatives

Design Strategy Consultant | Various Clients | 2021 - Present

??? Provided design strategy consulting for tech startups

??? Developed user experience frameworks

??? Created visual identity systems and brand guidelines

KEY PROJECTS

SOC-it-to-EM-SIEMlessly | Cloud-native SIEM Automation Framework | 2025

??? Built cloud-native SIEM automation framework with Terraform, Lambda, and EventBridge

??? Implemented automated threat detection and response capabilities

??? Developed infrastructure as code for scalable security operations

AWS S3 Lambda Ingestion Pipeline | Cloud Incident Response Automation | 2025

??? Evolved AWS Lambda + S3 ingestion pipeline into SOC automation foundation

??? Integrated AWS GuardDuty, Security Hub, and automated response systems

??? Implemented HCL-based infrastructure for cloud security operations

Network Security Lab | IDS/IPS Testing Environment | 2025

??? VirtualBox-based IDS/IPS lab using pfSense, Kali Linux, and Metasploitable2

??? Implemented comprehensive network defense testing capabilities

??? Created hands-on cybersecurity training environment

EDUCATION & CERTIFICATIONS

Cybersecurity Specialization | Various Online Platforms | 2023 - Present

Design Strategy & Creative Direction | Professional Development | 2021 - Present
